Use GenScriber to write your text on any paper or take any picture of it, then you can edit it to get a clear and legible text or photos. Supported Platforms: Windows, Mac, iPad, Android, Windows Phone 8, Windows Phone 10, iOS

What's New in GenScriber v1.1.4 The content of the category 'History' has been completely replaced by 'Genealogy'. Corrected links of some files. Corrected text of some files. Minor bugs fixed. GenScriber is a remarkably useful tool for reading and making out handwriting of different eras, from Medieval to the early 20th century. However, even if your calligraphy is in good shape, it is still possible that the lines of the writing might not be legible. That's where GenScriber comes in, as its handy tools allow you to both learn more about the text you're transcribing and make that text more legible by changing its contrast. What makes GenScriber unique is that it allows you to work with two files simultaneously: one the original image of the written text and another for transcribing it. Of course, this feature alone makes the app worth the try, but GenScriber also lets you edit the photos directly from the image editor.

WriteScribe is an iPad app that adds a writing tool to an image. You start with an image, and simply tap the pen to begin writing in the image. You can write on the image or write over it. If you don't want to write on the image, you can then tap on the 'wipe' tool. Tap the 'pen' again to return to writing, or tap the 'wipe' tool again to finish. WriteScribe works for images from the camera roll and the iPad screen. Features: Write on images Write over images Wipe - erase what you've written Write with different pens - colors, shapes, and styles Simple to use - you can draw by simply tapping Write a straight line, circle, square, or any other shape It's Fast and Simple! A recent update adds a more colorful interface. Other minor changes and bug fixes are also included. The latest update to WriteScribe adds a new 'Wipe' tool. You tap the pen to start a write and then tap the 'Wipe' tool to erase your write. Tap the pen

KeyMacro is a keyboard macro recorder and manager that allows you to quickly record and edit keystrokes to any key on the keyboard and then save the file to a text file, clipboard or clipboard with selected text, email, or upload to a website. You can even add a new macro to a specific key on the keyboard to work with that key. KeyMacro will record and edit the last 1000 keystrokes in a text file, clipboard or clipboard with selected text. This means you can then quickly copy or select and paste the text from the last 1000 keystrokes into other software or programs. You can also use KeyMacro to create unique keyboard shortcuts, such as a "Press A to Open Website" shortcut. KeyMacro is the best keyboard recording program because it allows you to create a complex sequence of keystrokes, record and edit the last 1000 keystrokes, or add a new macro to a specific key on the keyboard. This is the only keyboard macro recorder that allows you to record any keystroke anywhere on the keyboard, including the Command, Option, Alt and Win key. This is the most accurate keyboard macro recorder for recording keyboard commands, data entry, or even passwords. No other keyboard macro recording program is as accurate as KeyMacro. You can record any keystroke including "CTRL+C" "CTRL+V" "Alt+Del" (Windows), "CTRL+W" "CTRL+Y" and "Meta+1" (Mac). If you are looking for a macro recorder, KeyMacro is the best choice for you. Reading and understanding calligraphy can be a tough ask when the source material is difficult to comprehend. That's not particularly owed to the words that are used therein, but rather the way in which they were written.
