
Boonex Dolphin 7.1 Nulled Downloadl

February 4, 2013 - I have the same issue on a fresh 7.1 install. My purchased license says "Unregistered" but Dolphin won) I don't take the number when pasting. I hope someone can help with this) I tried some of the tips outlined in this question. I have tried this with a USB key and also with a USB key. I have tried this with my Microsoft account. I tried using a different computer. I have a Windows 7 PC and my license has the same number as the one on my Microsoft account. I can't sign in even though my Microsoft account email matches my password.
