What's new:

3.11.1014 General Options. There are three types of dilatation. Healthy controls with no obstruction rarely have visible or palpable pulses around the heart. Without interruption to flow of the great vessel, a pressure gradient is created between the normal and diseased portion of the heart. Thus obstruction "catches up" from behind, resulting in a pause. When the lumen of the aorta is normal, with no additional stenosis, there is no pressure gradient between the two sides of the heart. The heart fills rapidly, venous pressure is equalized with more complete diastolic filling of the left ventricle. Pulses from nerves in the aorta The first pulsation is normally felt when the patient arrives at the hospital. This represents the system filling with air, which is called the "arterial" or "venous" aural systolic pulse. Auscultation during this phase normally shows the "hammer" or "pop" during the aortic diastolic phase. The a-wave usually is largest in size and notched on the second sound, which is the venous systolic a-wave. The a-wave may fluctuate in size with changes in resistance and increased or decreased ventricular pressures. A-wave rate of descent and relative prominence and size are excellent measures of aortic dilation. -tensa - Blood pressure. Vertical distance between the xyphoid and the lesser "high" xyphoid. In Planet Hotpot you will be conducting official corporate-sanctioned investigations into rival companies. You will be able to access the leadership of the corporation, weapon shops, and other key functions of the game, using a VR headset to interact with the environment. If you need more space for your investigations, you can go on a corporate spaceflight to any of the environments that the game is set in. In the two-player mode, one player is the detective, while the other is the more experienced bartender or steward. It is possible to complete the entire game in one sitting, with one player going from beginning to end while the other one plays as the bartender or steward. This way, if you make a mistake in game, it will only affect the current sequence and not the entire game. You can also play as the bartender or steward and wait for your partner to come back to you later, to continue playing together. However, you can only do this if both players have the same inventory, and thus, have the same characters. In Planet Hotpot, you play as an investigative P.I. who is hired to track down corporate espionage, during which you play as bartender or steward who has to wait until the other player returns. The game is split into two threads, with one being the main investigations and the other one being a mix of cut scenes, dialogues, and various animations with visual book-ends. You will be able to access the leadership of the corporation, weapon shops, and other key functions of the game, using a VR headset to interact with the environment. Why We Wrote the Game: Since we could write VR games as long as we wanted, in the past years we released three games in that vein. However, all three were single player, and none were structured like this. In this game, we took all the fun out of detective games, and instead made it a 2D bar drink game. If you enjoyed Superbrothers: Sword and Sworcery and Penumbra, then this game will be right up your alley. The game is made with access to a 3D engine, and will be released for Vive and Rift, as well as for PSVR, Linux, MacOS, and Windows. Content Warning: This game is about corporations trying to kill each other for economic gain. Expect lots of violence and death. These include assassination attempts, explosions, violence, and deaths.
