In the 1970s, the first CAD programs using user interface concepts were developed. In 1983, AutoCAD was released. Since then, AutoCAD has become the world's most popular CAD software, with more than 2 million users and 500,000 licensees. It's estimated that 90 percent of all engineers, architects, drafters, and other technical people in the world use AutoCAD to create, modify, and organize technical drawings. Click menu and select File. Select "Create New" Open the newly created.lwp file, choose "open as data file" and save it in "c:\autocad2010". Why does the file autocad2010.lwp appear in C:\autocad2010 instead of C:\autocad2010\autocad2010.lwp? (I am using Windows XP SP3) A: This is the expected behavior on Windows. A file with the.lwp extension is an installer (.lpi) file. It is a wrapper to install the Autocad 2010 redistributable package and is an optional step. The Autocad 2010 setup will continue if you don't select the.lpi file to install. Once Autocad 2010 has been installed you'll want to delete the Autocad 2010 folder from your computer. Q: How to get the starting time of a day? How can I get the starting time of a day? For example: 1:00 AM 2:00 AM 5:00 PM 8:00 PM A: The shortest way to do it is to use a function like this: public static DateTime GetStartOfDay(DateTime d) { DateTime time = new DateTime(d.Year, d.Month, d.Day, 0, 0, 0, 0); return time.Add(TimeSpan.FromMinutes(60)); } It basically takes the time and adds one minute to it. If you do not want a minute interval, you may use: DateTime time = new DateTime(d.Year, d.Month, d.Day, 0, 0, 0); return time.Add(TimeSpan.FromHours(24)); A: var times = new[] { DateTime.Parse("01/01/2013 12:00:00 AM"), DateTime.Parse("01/01/2013 12:00:00 PM"), DateTime.Parse("01/01/2013 11:00:00 PM"), DateTime.Parse("01/01/2013 08:00:00 AM"), DateTime.Parse
