Features New with Release 2023: Multi-Screen Editing: One of the fastest ways to edit drawings on multiple screens is with Multi-Screen Editing (MSE). Before, to edit on multiple screens you needed to open a drawing on each monitor, and you had to manually switch between different drawing windows. Now with Multi-Screen Editing (MSE), you can open and edit drawings on all your screens at once. It's fast and efficient, which means it can save you time. Plus, you can add text and object attributes directly on the screen or directly to the drawing. This is especially useful for manufacturing workflows when it's easier to make changes to the drawing than to search for them in other parts of the application. Multi-Screen Editing is one of the most useful features in AutoCAD. It's a great tool to use when you're getting into using multiple screens.
