The game will be developed on Xbox One and Steam (PC) platforms. ABOUT US VATECHO is developing the game based on the concept of "LOTS". We are developing with VR and AR in mind to design a game that perfectly fits in those mediums. Our goal is to offer deep strategic, action, RPG and loot-driven gameplay. Our goal is to provide an RPG experience to satisfy the most hardened MMO players as well as the biggest action fans. VATECHO is currently developing under Microsoft's 'lots' scheme, which offers the developer six months of development time on a fixed budget. In the game, you will fight against the adversaries that surround you and make your way through the Lands Between to become the Elden Lord of the stronghold of your choice. To become the most powerful Elden Lord, you must train yourself by fighting against the many and diverse adversaries that are awaiting you in each stronghold. The battles take place in the game in an environment formed by a vast world, so you must accept the challenge to create your own strategy. You can freely develop your character by equipping armor, weapons, and magic, or you can equip a spell from a selection of the six magic spells. The six magic spells are special abilities that help you out in the battles. You must equip your character with a combination of several magic spells. You will also find spells and skills that add to the potential of your character. FIFTH ELDEN RING GAME. INFINITY RISING / GAME OVER / DESTRUCTION The game

## **What's new in Elden Ring:**

**Dota is the Chowderdota-server for ( Chowder is a free cwf (console wad) editor. You can download it on their homepage: Build your own cwf (chowder file) for Warlords of Draenor or older. Supported since version 15.08.05. Description: Chowder is a free cwf (console wad) editor. Chowder is also a cwf (console wad) that can download from the webpage of [www.cwf.org](http://www.cwf.org). Chowder started out as original development by the author of cwf. Chowder has grown into a game on its own. If you like to build console wads, this is a very nice place. Install: Chowder is not a server, the server is online when you launch it. You must download chowder itself and the ownwads. Go to and there download either chowder, or chowder with ownwads, Chowder with ownwads must be in the directory c:\cheese. You can only host it when you own all the files in that directory. On windows, reinstall the chowder.exe when you have no more opportunity. Cyanide Cyanide is a themed game. It can be played with both qeep and counterstrike controls. (CqC is fine too) Cyanide currently has a single working server, but is in early development. For now, it is best to use servers such as QC or Nanos to play the game. It is similar to a fps called Company of Heroes that has a single server on both steam and Nanos. Matchmaking Cyanide currently only supports the following modes of matchmaking: (this is just an idea for next alpha, but feel free to add it) Team Matchmaking (alliance) - search the server for a group suitable to play your level Team Matchmaking (alliance) - Zerg crush (alliance) Team Matchmaking (alliance)**

Matt Barnes has been reportedly cleared to return to the NBA. Barnes has been dealing with injuries over the last few months including a quad injury, missing 29 games. Once he returned to the court on December 1, it seemed as though Barnes was back to health and a great performance in the game against the Philadelphia 76ers saw Barnes score 12 points, grab 7 rebounds, and dish out 4 assists. He was welcomed back to the court and even started regularly for the first time since his rookie season. Currently Barnes is still recovering from a quad injury and it seems unlikely that he can get back to where he was. As of right now he isn't even with the team. Barnes was not spotted in the locker room on Tuesday morning. It appears as though he hasn't been cleared for workouts yet. It's unclear why Barnes is not on the court with the team but it's safe to say he is out. At this time, Barnes is not expected to be back until sometime

after the All Star break. The Miami Heat's decision to sign Josh McRoberts isn't surprising considering the fact McRoberts was the Heat's best defensive center. He was a very good NBA player in the paint, something Barnes was never a major asset at. This move doesn't bring the production or floor spacing that Barnes brings to the table. Barnes is a savvy passer, great rebounder, and was always known for his outside shooting. McRoberts is more of a shot blocker, rebounder, and interior scorer. We have heard Barnes rumors in the past but Barnes is clearly not in a situation where he should be able to return.

Zhang Yonghai Zhang Yonghai (; 7 July 1940 – 28 March 2017) was a Chinese computer scientist, known for establishing the first microcomputer programme studio in China, and for the development of many other early information technology products, especially optical disk readers, networks and TV/broadcast technology.
