The "F-15C: The Georgian War" campaign puts you at the heart of a tense military standoff over the breakaway republic of South Ossetia. You and your crew have been deployed to Tbilisi to present the F-15C to the Georgian government, and on the 8th August, conflict begins to escalate between Russian and Georgian forces. To save the lives of your fellow pilots, you and your team are ordered to stand your ground while you work to successfully fly several of the F-15C airframes through enemy fire. In one of the campaign's many missions, you're tasked with escorting a VIP from Moscow through the enemy fire to the Georgian lines. You and the pilot on your wing are attacked first by Su-27 and AA-12 "AL-Nashiri". You quickly engage the enemy with missiles and a short but intense dogfight follows. The Georgian military forces may not be the most skillful in the world, but they're certainly keen to try and convince the world that they're not like the rest of the worst nations in the world. As the mission evolves and the stakes get higher, the Georgia Air Force gets more and more desperate. Georgian military officers who've been completely unfit for combat for years are suddenly given orders to make up for their incompetence. First an order is given to secure the VIP's safe passage to the front line by any means necessary. Then a flank attack on your own team is ordered as part of a new plan to try and keep Georgia a sovereign country. Play this Campaign now for only \$15, and achieve true glory as you protect another nation! You can also play the entire Georgian Campaign of Flaming Cliffs 3 here for FREE. The African Child Policy Monitor reports that the world's largest refugee receiving country, Ethiopia, has introduced policies in its cities and towns that effectively ban the practice of selling and giving birth to multiple births within the same home. The monitor states that the move was prompted by the discovery of many deaths among these infants. The report argues that these measures are discriminatory and a breach of the principle of non-discrimination. It adds that the ban on sales and birth of multiple births is contrary to Ethiopia's official policy, and should be urgently reviewed and suspended. The Ethiopian parliament has recently recommended policies to end birth of multiple births and the policy has been adopted in several towns. The Monitor says that although these measures are in line with the government's stance against female genital mutilation, they also go against international human rights law and will discourage pregnant women from seeking prenatal care or worse, abort their babies when they discover that they are carrying more than one child. The ban on multiple births is a breach of the principle of non-discrimination, says the Monitor. Prior to the ban, Ethiopian mothers relied on traditional midwives who offered a range of remedies for both preventing multiple births and managing complications including the storage of the placenta. ed!!!! Was witnessing the show WOW. Really dig it with the sword, but how did you get away with such popularity before the Cataclysm??? He got a hell of a lot of crit. Those people who don't know anything about video games watch the show and think there is no end in sight. They don't realize it until the next day when they know that they will be destroyed in 5 seconds by the zombies in their mocap. The thing is they might not realize it until they die. That's just how pug works. You have a lot of people who don't know anything about video games, many of whom are probably teenagers, watching live and voicing it. You have a lot of under-informed people who can't and wouldn't know any better in first place and give them shit, especially by a mere enthusiast. You have far too much passion and you let it get the best of you and bleed it into hatred. You have people who play video games and read community feedback, and then just laugh at the guys who know the games simply because they know more than them. There's a big difference between the hordes of rubber monsters and the hordes of rubber monsters that know mechanics and attack mechanics and know how to use them. Seriously, every day you play a match you get closer and closer to knowing more than the majority of people who watch the show, who watch the commentary, who tell it like it is and don't beat around the bush. Do not mistake yourself into thinking that you are not prepared just because you are a fanboy, just take a moment to relax and genuinely shut the fuck up, you're not alone in your beliefs, you're just not nearly as positive about them as you think. I mean you want to hate people who have no reason to be convinced about your side because you are truly ignorant. All you have is your holy crusade you're on, absolutely no reason to be proud of it or argue it other than yourself. You have to tell someone that the logic of your argument is the only thing we care about? Nevermind man, most of these people are full of tits, you can eat their flesh and poison your system in 4 and you're fine, no pill in the world is going to help you. Your statement doesn't help in combating groups that are trying to provoke other groups. When I advocate for Tidal Wave, it is to advocate for those people who play
