Game modes: - Breakpoint game: Keep your game as close to a BreakPoint game as possible while still having a reasonable amount of balls on the table. Using the extra balls will help you play better. - 4 Ball game: The extra balls make it difficult to use potting. The good thing about this game mode is that you still have a reasonable amount of balls on the table. - General game: We've extended the game modes to support as many balls on the table as possible. So you will be dealing with tons of balls. The game is still playable, but you will be in a crazy simulation. In All 3 game modes, there are 3 shot types. Fancy Shot: An easy shot

The Game Play: Many players want to play real Snooker, however, most are out of luck as the rules are a bit difficult to follow and understand. Flash Snooker gives players easy to understand gameplay using modern snooker rules with real world physics, ensuring the game will not only play realistic, but that the game will keep pace with the human response in terms of playing snooker. One of the benefits of using Flash is that Snooker controls have been re-designed to give the player a realistic cue ball movement. Players can choose to control the cue ball either with the left or right mouse buttons, giving them a very natural cue ball control. Additional Features: The game comes with the ability to choose between the standard GLS 40 column main frame or a 34 column version, as well as choosing between a black frame or green frame. This is similar to a real Snooker table, making it perfect for the casual player. The player controls play using the WASD keys (or arrow keys if selected) and left click to cue up and right click to release the cue ball. That means that you don't have to worry about moving your mouse to shoot as the game has taken care of that for you. You can choose to play the game either single player or multi-player, with the game having player lobbies where you can meet up with friends to play Snooker. The player statistics are kept on a user-defined 'Play History' table which allows you to see past statistics on how your game has progressed over time, how much you've been playing, and your overall statistics. The Game play statistics: The Game Play statistics in Flash Snooker Player stats: You can view all the detailed statistics of your game play sessions, for example, how many shots you've made, percentage of balls made, percentage of 'hots' missed, how long your game has taken to complete, and more, the statistics will be added to the user-defined 'play history' table. Statistics for a specific player are available by clicking on the player number in the lobby. Snooker Shot Control: Game "Flash Snooker Game" Shoot Control: The Snooker shot controls are the same way that real Snooker is played by the traditional way, with the'shooting spot' being the side of the snooker table. Players can choose to hit the cue ball by either left or right clicking or by using
