In this demonstration, John is going to cover the basics of Creating an Illustrator template in Illustrator to be sent to the Imacros Author for placing, animation and everything else you want in your Illustrator template. DownloadMac OS X 10.7 Lion (10.7.0 to 10.7.0) Installer ISO (100MB) | Installs Lion on Macs – Lion is a release of Mac OS X released in July of last year. Lion also introduced a revamped installer, which is the subject of this tutorial. The new Lion installer is the third installer overall, having replaced the pre-Lion versions of the installers developed for Snow Leopard (2007) and Lion Developer Preview (2010). To begin, we need to find where the new installer is installed. Scroll down to the bottom of the installer window and click on “Open at Login”. This will open the new installer at the login screen. Next, click on “Security”, then click on the lock symbol. After this, click on “General”, and then click on “Continue”. Now click on “Startup” and verify that “Automatically launch and use the following items at startup” is selected. Click on “OK” and you should now find that the new Lion installer is in the Applications folder. Optionally, you can simply open the new installer. Click on “Install” and agree to the agreement when you get the “Installer wants to make changes to your computer” message. Next, provide your login credentials, then click on “Continue”. You will be asked to “Choose where to install the software”. You will want to make sure you select the entire drive and none of the “Existing Applications” folder, in this case, the drive “Macintosh HD”. Finally, click on “Install” and agree to the agreement when you get the “Installer wants to make changes to your computer” message. After this you will have the latest installer, which will not affect anything on your hard drive in any way. Conclusion
