windows7bydimitarglrar wrote: Something I did not see that someone would write about problems with USB, but I think it's better to put "USB: Disable USB" in the settings and everything will work. You can also try "USB: Disable USB/Disable USB Flash Drive Drive" I didn't see either. But it seems to me that it would be better not to turn it off, because. it's not entirely safe. Moreover, many files will be copied in USB mode. And in order not to disable USB ports, you need to disable "Autorun" in the BIOS. I already wrote above,
