
Total Commander V9.12 Final (x32-x64) .rar

December 4, 2013 - Tried using the internal RAR decompressor, I used to always use the . and select say .r05, you will only get files from .r05 to .r12 . r12 is not unpacked As a result, I still got a file that can be opened, but its contents differ from the contents of the .RAR file. When trying to compress the archive, it gives an error. And if you still try to compress, then I don't even know what to do next. The support site says that to use the internal rar unpacker, you need to use the rar2 unpacker. And I don't know how to use it. If someone had similar problems and someone found a solution, please share. Thank you in advance.
