pc action games is proud to present murfy's campaign pack! this pack includes the murfy campaign, murfy's arcade, murfy's amusement park, murfy's arena and murfy's restaurant! download murfy's campaign today and let the action begin! just as i had done with simcity 4, i thought this time i'd get into a multiplayer game with it. i've never played an online game before, so this would be a good place to start for me. the most common complaint i hear from command and conquer players is that they can't seem to find a game, so i figured i'd start this one out and see how i like it. then i'd try and get the rest of the titles sorted out before moving on to other things. important note: windows 10 anniversary update, windows 10 november update, windows server 2016, windows server 2012 r2, and windows server 2012 can render some of the files in this library .rar files corrupted. these files have been removed from the library and should not be used. for those running windows 10 version 1803 (or a later version that includes the november update), you may be able to use the folder fix to repair the corrupted files. this fix will not work on windows version 1709 or windows server 2016. red alert 2 pc gameplay patch adds a variety of fixes and changes to the game. some notable changes include: [borderline extreme] in minigames, the time counter will no longer count down when the mini freezes. [btb special edition] there is a new btb special edition, which allows you to buy a skin pack of btb skins. there are 5 new skins in this btb special edition. [nexgen] the look of the nexgen-class ship has been changed. [bank] if you delete the bank file from the game directory, the bank screen will disappear. [musica] musica i got to change my passwords!!!!!!.. (too hard to find them) [refit] it is now possible to do cer on the saucer, and the cockpit is in the air. [tower] the antiterrorist task force tower will not be relocated if the game is transferred to an external drive. [uo] it is possible to use putty when training a user. [ai] it is now possible to train ai like [r.a.p.m.] or [librarian] or [milli]. [tolstoy] the tolstoy's gunship will not become active. [nyo] if you bring too little money into the game, a dialog box will appear. [nexgen] it is now possible to use the ship's weapon after activating it. [minigame] in minigames such as the tower, some doors will appear opened. [librarian] the librarian can now read dialog boxes. [uo] the ui in uo will now be in color. [tolstoy] the task-force 'thermobaric grenade' has been added.
