[The effect of pH of the airway liquid on the respiration of chickens]. A study was made of the impact of changing the pH of the airway liquid on the respiration rate of living chicken embryos in the period of incubation. Experiments were made on eggs of the chicken-of-strains-Bau, Csak and lines hybrid of those. The direction of changes in the pH of the airway liquid was alternated daily, in the resting period in conditions of 2-4 degrees C, and in the periods of the incubation and the first 4 days of post-incubation at the ambient temperature of 22-24 degrees C.The building that will make JBS' Brazil S.A. headquarters is being built in the city of São Paulo, Brazil. The construction of the headquarters for the group will cost at least US\$76 million (R\$251.3 million) and the company expects the facility to be completed in July 2013. JBS Brasil S.A. said the new headquarters will have over one million square metres of offices, a cafeteria, training area, and a 400-seat amphitheatre.
