is a clipboard tool. By using the clipboard it is possible to perform complex operations on files. For example, you can add and remove characters from a file name, change a file, change the extension, duplicate a file, rename a file, compress a file, or you can even search for files on your hard drive.

ThisIsMyFile works by using the Windows Clipboard. If you want to learn more about the clipboard and all the commands that you can perform with it, click here. You can use the following functions from the Options dialog: add chars: - Adds a character to the end of the file name. - You can use the following characters as placeholders: - Chr(n): The number of the character you want to add. - Example: If you want to add the letter 'X', you will type 'Chr(48)'. - If you want to add more than one character at a time, type 'Chr(n)' for the number of characters you want to add and then enter them, separated by ';'. - When you enter multiple characters, use the same code that you use to add multiple files. For example, if you want to change the file 'www.website.com/file.zip' to 'www.website.com/file.gz', you can use 'Chr(35)';. - When you want to include the directory name, you have to use 'Chr(34)'; and then enter the name of the directory. - When you are removing a character, you have to use 'Chr(-1)'; and then the character you

#### What's New in the ThisIsMyFile?

ThisIsMyFile is an easy and lightweight application that gives you control of the files and folders you are currently using. It allows you to unlock them from their lock state or to get rid of the protection of files or folders. Secure backup for Dropbox Description An application for securing and backing up your Dropbox account, created by the developer of free Dropbox backup application Secure Dropbox Secure Dropbox is an application that provides you with a simple and convenient way to secure your Dropbox account. The application works offline and doesn't require Internet connection, but you can still back up your files to the cloud. With Secure Dropbox, you get a secure version of your Dropbox account that you can share with a password, allowing you to access your files with a simple PIN. Secure Dropbox is an easy-to-use backup tool that allows you to back up your Dropbox account to the cloud and to create a secure version of your files, so that they can only be accessed with the right password. With Secure Dropbox, you get a secure version of your Dropbox account that you can share with a PIN, allowing you to access your files with a simple PIN.1. Field of the Invention The present invention relates to the preparation of stable, aqueous solutions of aqueous hydrogen peroxide and a compound of the formula (1): in which R1 represents a hydrogen atom, a halogen atom, a halogenated hydrocarbon group or a halogenated hydrocarbon radical optionally substituted with halogen, R2 represents a hydrogen atom, a halogen atom, a halogenated hydrocarbon group or a halogenated hydrocarbon radical optionally substituted with halogen, m represents an integer from 1 to 6, and n represents an integer from 1 to 5. 2. Description of the Prior Art Hydrogen peroxide and alkyl peroxides of the formula (2): ##STR1## in which R1, R2 and m are as defined above, are important industrial chemicals which can be used as oxidizing agents and bleaching agents. Since the alkyl peroxides decompose easily to give free radicals, the use of hydrogen peroxide or a compound of the formula (1) for bleaching or bleaching/cleaning is largely limited. Therefore, it is desirable to stabilize the solutions of hydrogen peroxide and compounds of the formula (1). EP 0 447 329 describes the addition of phenols to aqueous solutions of hydrogen peroxide in order to stabilize these solutions. If these phenols are used in the form of benzotriazole, benzotriazolium chloride or benzotriazolium hydroxide in which the phenol ring is either non-substituted or substituted with one to three alkyl radicals, the stability of the aqueous solutions of hydrogen peroxide is only adequate for short periods.
