I want to retrieve the first number after a match of the pattern {prefix}{number} in the first 7 characters of the table. The following works, but I want to do it in one select: SELECT LEFT(CONTRACT\_TYPE, 7) + SUBSTRING(CONTRACT\_TYPE, 8, LEN(CONTRACT\_TYPE)) FROM #test Thanks A: Use SUBSTRING(CONTRACT\_TYPE, 1, CHARINDEX('{prefix}{number}', CONTRACT\_TYPE) - 1) I would recommend not using the FROM clause to join to a temp table. Use an explicit join instead: SELECT LEFT(CONTRACT\_TYPE, 7) + SUBSTRING(CONTRACT\_TYPE, 8, LEN(CONTRACT\_TYPE)) FROM #test t INNER JOIN (SELECT SUBSTRING(CONTRACT\_TYPE, 1, CHARINDEX('{prefix}{number}', CONTRACT\_TYPE) - 1) + 7 AS NEW\_COL) match ON SUBSTRING(CONTRACT\_TYPE, 1, CHARINDEX('{prefix}{number}', CONTRACT\_TYPE) - 1) = NEW\_COL Q: Regarding Online Shopping If you are shopping online and you are moving onto another page and another page and another page and the time you think you have spent is a half hour and you then leave the website for a day. What could happen? Will it remain as a half hour that you've spent? A: You might want to change the "date and time" on your "billing system".
